

SecuSignal® – shows you
what you should know
about your windows!

for all HOPPE
door- and window handles!

What does SecuSignal® offer?

Wouldn't it be assuring if, before you left the house, you could check at a glance whether all windows were closed or not?

SecuSignal®, HOPPE's new window handle generation with **integrated radio technology* without the need for batteries** can offer you just that!

- **The receiver can deal with up to 128 SecuSignal® radio emitters.**
- **The SecuSignal® emitter needs neither wiring nor batteries.**
- **HOPPE brand quality, simple installation and no maintenance.**

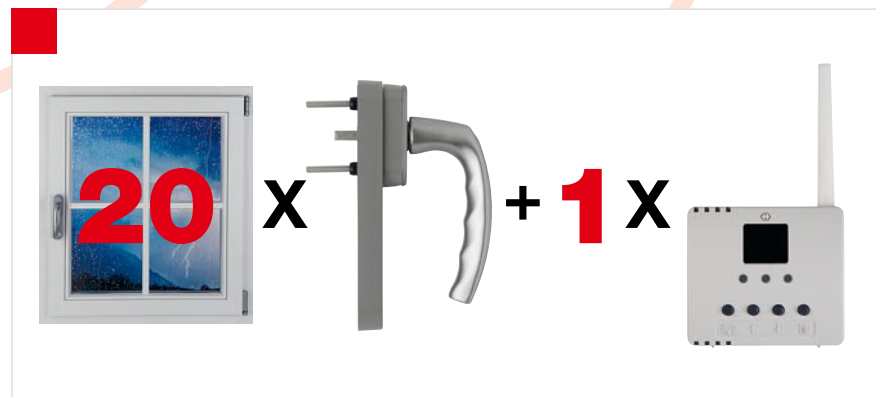

What do I need to equip my house with SecuSignal®?

All you need is

- a SecuSignal® window handle on each window and an emitter
- a SecuSignal® receiver

Example: If your house has 20 windows

The SecuSignal® range

The finishing touch in attractive handle designs and materials

SecuSignal® window handle designs with Secustik® technology*

Atlanta
0530/US952/FK-410
F9/F7501 (aluminium steel/steel grey) finish

Atlanta
M0530/US956/FK-410
F71/F1509 (polished brass/yellow gold) finish

Amsterdam
E0400/US956/FK-410
F69/F7501 (stainless steel matt/steel grey) finish

Secustik®

* All SecuSignal® window handles have the latest HOPPE Secustik® technology! Secustik® window handles have a patented mechanical blocking mechanism as integrated basic security. This makes a precise clicking sound as the window handle is moved to different positions and helps prevent the window hardware being moved from outside.

You can find further information on www.hoppe.com.

SecuSignal® receiver

FE-411
F7035 (light grey) finish

Easy, with assured transmittance and environmentally-considerate!
